

- 01 **Reliable:** Avoid the hassle of manually shutting off sprinklers when it rains — and turning them back on
- 02 **Effective:** Run irrigation only when needed and help save water in drought conditions
- 03 **Convenient:** Wireless communication simplifies installation, requiring only one installer and no wire hiding

MINI-CLIK® RAIN SENSOR

The Simplest Way to Automatically Stop Irrigation During Rainfall

With unpredictable and often extreme rain events increasing around the world, equipping your irrigation system with a rain sensor is an easy way to prevent overwatering and keep outdoor living spaces looking their best.

The reliable and cost-effective Mini-Clik rain sensor is equipped with state-of-the-art moisture detection technology to automatically shut off irrigation when it detects that a preset level of precipitation has fallen. Once the storm passes, the Mini-Clik allows the controller to resume normal irrigation.

Wireless Mini-Clik is compatible with all AC-powered Hunter controllers and wired Mini-Clik is compatible with all Hunter controllers. Use this simple yet powerful tool to maximize water savings, maintain healthy landscapes, and protect groundwater from harmful runoff.

MINI-CLIK FEATURES & SPECIFICATIONS

Key Benefits

- Shuts off irrigation automatically when the sensor detects rainfall from 1/8" to 3/4"
- Debris tolerant for reliable operation and no unnecessary shutdowns
- Wireless communication simplifies installation*
- Quick Response® technology triggers faster system shutdown for plant protection*
- Built-in freeze sensing halts system operation at 37°F to protect plants and keep roads and walkways ice-free*
- Maintenance-free design with integrated battery provides easy care and long life*
- Rugged polycarbonate housing and metal extension arm minimizes wear and prevents rusting
- Compatible with most normally open or normally closed irrigation controllers for ease of use in any setting

Operating Specifications

- Quick Response technology (when enabled):
 - Time to turn off irrigation system: approximately 2 to 5 minutes
 - Time to reset: approximately 4 hours under dry, sunny conditions
 - Time to reset when fully wet: approximately 3 days under dry, sunny conditions
- All models switch rating (24 VAC): 3 A
- Wired models include 25' of 20 AWG sheathed, two-conductor UL-approved wire
- Wireless model operating frequency: 433 MHz
- Wireless model range is 800' line-of-sight from sensor to receiver
- Multiple wireless receivers can be operated from a single wireless sensor
- Approvals: UL, cUL, FCC, CE, RCM
- Warranty period: 5 years

*Wireless Mini-Clik sensor only

MINI-CLIK	
Model	Description
MINI-CLIK	Wired Mini-Clik sensor
MINI-CLIK-NO	Wired Mini-Clik sensor, normally open switch
MINI-CLIK-C	Wired Mini-Clik sensor, conduit mount
SG-MC	Wired Mini-Clik sensor in a stainless steel sensor enclosure
WM-CLIK	Wireless Mini-Clik sensor, receiver, and gutter mount

Models

Wired Mini-Clik Sensor (with mounting arm)

Height: 2"
Width: 6"
Width: 1"

Wired Mini-Clik Sensor (with stainless steel enclosure)

Height: 5 1/2"
Length: 3"
Width: 4"

Wireless Mini-Clik Sensor (with mounting arm)

Height: 3"
Length: 8"
Width: 1"

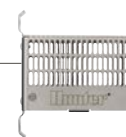

Wireless Mini-Clik Receiver (with wall mounting kit)

Height: 4"
Width: 3 1/4"
Width: 1 1/2"

Wireless Sensor Guard (with mounting hardware)

Height: 2 3/4"
Width: 3 3/4"
Width: 1 1/4"

Wireless Receiver Guard (with mounting hardware)

Height: 5"
Length: 4"
Width: 1 1/4"

USER-INSTALLED OPTIONS	
Model	Description
SGM	Optional gutter mount for wired models
WS-GUARD	Vandal-resistant wireless sensor guard for flat surfaces or pole mounting (order sensor separately)
WR-GUARD	Vandal-resistant wireless receiver guard for pedestal mounting (order receiver separately)
